SUMMARY

Computer Science student that designs, deploys, and monitors cloud-native applications on AWS with hands-on experience with EKS, EC2, S3, and CloudFront. Provisioned AWS resources with Terraform, plus CI/CD automation and AI-powered application features in Python. Experienced in explaining technical ideas clearly to non-technical audiences and focused on building reliable, scalable solutions for customers.

EDUCATION

Bachelor of Science in Computer Science — Georgia State University *Dec 2027*

- GPA: 3.83 / 4.00 | Relevant Coursework: Artificial Intelligence, Operating Systems, Data Structures, Theoretical Foundations of Computer Science
- Georgia State Perimeter College Ambassador (represented the student body at college events) — Aug 2024 - Apr 2025

TECHNICAL SKILLS

AWS & Cloud Architecture: EC2, EKS, VPC, RDS, S3, CloudFront, IAM — provisioned via Terraform (IaC)
Programming: Python, Java, JavaScript (Node.js, React), SQL, Bash/Shell
DevOps & Delivery: GitHub Actions (CI/CD), Docker, Kubernetes, Helm, Argo CD, Git/GitHub, Jira, automated testing
Observability & Security: Prometheus, Grafana, Loki, Linux, CompTIA Security+
AI-Assisted Development: Google Antigravity, GitHub Copilot, AWS Kiro

RELEVANT PROJECTS

Smart Course Scheduler — Cloud-Native Microservices Platform *09/2026 – 10/2026*

- Architected a 5-service microservices platform on AWS EKS using Docker and Kubernetes; provisioned 16 AWS resources (VPC, RDS, S3, CloudFront) with Terraform, cutting environment setup time to under 20 minutes
- Added an AI feature that converts a screenshot of a student's classes into a ready-to-use timetable designed to avoid burnout
- Built a full-stack application that turns a student's courses and preferences into a personalized day-by-day weekly schedule in under 2 minutes
- Automated build and deployment with GitHub Actions CI/CD pipelines, Helm, and Argo CD, with Prometheus, Grafana, and Loki for monitoring and logging

Task Management API *07/2026 – 09/2026*

- Built a containerized task management REST API (FastAPI, PostgreSQL) supporting create, organize, and paginated browse, with persistent storage and deployed to EC2 instance
- Added health checks and live monitoring dashboards (Prometheus, Grafana) tracking request volume, error rates, and uptime so issues can be caught and fixed within minutes
- Deployed with Docker and Kubernetes, provisioned EC2 infrastructure with Terraform, and built GitHub Actions CI pipelines with integrated automated testing

WORK EXPERIENCE

Student Assistant — International Scholar and Student Services *10/2023 – Present*
Atlanta, GA

- Collaborated with ISSS advisors to support 50+ international students and visitors weekly with strong customer service, resolving questions and ensuring smooth referrals to the appropriate campus departments
- Manage front-desk communications, calls, emails, and visitor logs while keeping accurate records in a fast-paced office environment

CS and Math Tutor — Student Success Program *08/2024 – 07/2025*
Clarkston, GA

- Explained Computer Science and mathematics concepts to students at varying levels, covering Python, Java, Algebra, Geometry, Calculus, and Statistics
- Improved students' course performance by an average of half a letter grade through individualized academic support

CERTIFICATIONS

- IBM (Certifications): DevOps, CI/CD, Docker/Kubernetes/OpenShift, Linux & Shell Scripting, Cloud Computing — 2026
- CompTIA Security+ — July 2025
- CodePath Cybersecurity I & II — May 2025

AWARDS

- Emory Hacks Runner-Up (built an EMT Training Simulator with a team of 4) — November 2025
- President's List (4×), Dean's List (3×) — Georgia State University
- Computer Science STEM Award (highest academic performance) — April 2025
